

Peripheral Nerve Society Biennial Meeting

July 14-18, 2007 • Snowbird, Utah

Plenary Lectures

Ueli Suter, Ph.D.

Institute of Cell Biology

Richard P. Bunge Memorial Lecture

Schwann cell-neuron interaction in hereditary neuropathies

David R. Tomlinson, Ph.D.

University of Manchester

Aetiology of diabetic neuropathy

Matthew C. Kiernan, Ph.D.

University of New South Wales

Nerve excitability properties in toxic and metabolic neuropathies

Rhona Mirsky, Ph.D.

University College London

GBS/CIDP Foundation International Lecture

Schwann cell development and myelin

Richard A. C. Hughes, M.D.

King's College London

PNS Presidential Lecture

Treating nerves

Wesley J. Thompson, Ph.D.

University of Texas at Austin

In vivo imaging of nerve and the NMJ

Sulayman D. Dib-Hajj, Ph.D.

Yale School of Medicine

Ion channel pathophysiology as a molecular basis for pain

Nobuhiro Yuki, M.D., Ph.D.

kyo University School of Medicine

GBS/CIDP Foundation International Lecture

ate mimicry in inflammatory neuropathies

Special Session: Career options in the field of peripheral nerve
Eva L. Feldman, M.D., Ph.D.

Scientific Review Committee: Claudia L. Sommer (Chair), Steven S. Scherer (Vice Chair),
Ryuji Kaji, Eduardo Nobile Orazio, Mary M. Reilly, Paola Sandroni, Michael E. Shy,
Andreas J. Steck, Jean Michel Vallat, Pieter A. van Doorn, Douglas W. Zochodne

Board of Directors: Richard A. C. Hughes (President), Eva L. Feldman (President Elect),
Robert R. Myers (Secretary/Treasurer), Patricia J. Armati, Eduardo Nobile Orazio, Michael Polydefkis,
Mary M. Reilly, Angelo E. Schenone, Michael E. Shy, Claudia L. Sommer, Anthony J. Windebank

Peripheral Nerve Society • 9500 Gilman Drive, MTF 445, La Jolla, CA 92093-0629 • PNS@ucsd.edu

Peripheral Nerve Society

Abstract Deadline: February 2, 2007 • Registration Deadline: May 4, 2007

Program of Sessions

Saturday, July 14, 2007

Welcome Reception and Dinner

Sunday, July 15, 2007

Poster Session 1

Plenary Lecture 1, GBS/CIDP Foundation International Lecture:

“Carbohydrate mimicry in inflammatory neuropathies”, Nobuhiro Yuki

Platform Session 1: “CIDP”, “Guillain-Barré Syndrome”, and “Treatment”

Plenary Lecture 2, PNS Presidential Lecture:

“Treating nerves”, Richard A. C. Hughes

Plenary Lecture 3: “Aetiology of diabetic neuropathy”, David R. Tomlinson

Platform Session 2: “Diabetic Neuropathy”

Evening Special Interest Groups

Monday, July 16, 2007

Poster Session 2

Special Breakfast Session: “Career options in the field of peripheral nerve”, Eva L. Feldman

Plenary Lecture 4: “In vivo imaging of nerve and the NMJ”, Wesley J. Thompson

Platform Session 3: “Degeneration/Regeneration”

Free Afternoon • Evening Special Interest Groups

Tuesday, July 17, 2007

Poster Session 3

Plenary Lecture 5: “Ion channel pathophysiology as a molecular basis for pain”, Sulayman D. Dib-Hajj

Platform Session 4: “Channels” and “Pain”

Plenary Lecture 6: “Nerve excitability properties in toxic and metabolic neuropathies”, Matthew C. Kiernan

Platform Session 5: “Electrophysiology” and “Diagnostic Methods”

Young Investigators Platform Session

Plenary Lecture 7, Richard P. Bunge Memorial Lecture:

“Schwann cell-neuron interaction in hereditary neuropathies”, Ueli Suter

PNS Farewell Banquet • Awards

Wednesday, July 18, 2007

Poster Session 4

Plenary Lecture 8, GBS/CIDP Foundation International Lecture:

“Schwann cell development and myelination”, Rhona Mirsky

Platform Session 6: “Development” and “Schwann Cells”
