2007 Young Neuroscientists' Workshop

September 16-19, 2007

Solvang, CA

Contact: Shane G. Smith, Ph.D., (805) 898-4442

Description: In 2007, the CNS Foundation and the UC Santa Barbara Neuroscience Research Institute will launch the *Young Neuroscientists' Workshop*. This bi-annual meeting series is intended to expose post-doctoral fellows, clinical fellows and senior graduate students to emerging thinking about childhood brain disorders, with the long-term aim of seeing more of these young investigators incorporate the study of these disorders into their career objectives. The formal Workshop program will include: poster presentations by the young neuroscientists followed by an opening reception and keynote address; seminar-style presentations focused on salient aspects of neurogenetics research and its clinical applications; and faculty presentations focused on how they have built their careers studying neurogenetics or other areas of neuroscience. The Workshop will conclude with a friendly proposal competition we call "The Game," which is intended to foster informal but scientifically productive interactions between senior and junior scientists. CNS and UCSB-NRI look forward to hosting several Santa Barbara-area special-needs families at the reception; and are pleased to have secured two high-profile speakers for the meeting's opening reception – University of Pennsylvania researcher Dr. David R. Lynch and actress Laura San Giacomo.
